SAJJAD FALLAHYEKTA
LINUX ADMINASTRATOR

Graz | +43 677 62412041 | Email | LinkedIn | GitHub | Driving License

Experienced Linux Administrator with a strong background in managing and optimizing server environments. Proficient in automation, system security, and troubleshooting. Passionate about leveraging open-source technologies to drive performance and reliability.

Experience

2022-2024
Linux System Administrator | Dotin Banking Services

- Provided support and maintenance for Linux servers, including software updates, backups, and troubleshooting.
- Assisted in configuring and managing network services (DNS, DHCP, NFS, SMTP) and storage solutions (RAID, LVM).
- Monitored system logs and performance metrics to proactively identify and resolve potential issues (Kibana (KQL), Zabbix).
- Documented system configurations, procedures, and troubleshooting steps to improve team efficiency.
- Worked closely with senior administrators to implement and test disaster recovery plans.
- Managed and maintained over 200 Linux servers, ensuring 99.99% uptime.
- Automated repetitive tasks using shell scripts and configuration management tools, reducing manual effort by 40%.
- Configured and managed virtualization platforms (VMware) and containerized applications using Docker and Kubernetes.
- Monitored system performance and optimized resource usage, leading to a 90% improvement in system efficiency.
- Collaborated with development and support teams to resolve critical issues and ensure seamless deployment of new applications.
- Provided on-call support for critical system issues, ensuring prompt resolution and minimal downtime.

2021-2022
Linux System Administrator | Fannavaran

- Managed the end-to-end process of application releases and product deployments in a Linux environment. Utilized automation tools (e.g., Ansible, shell scripts)
- Implement and maintain automated scripts using Bash and Ansible to streamline system administration tasks.
- Monitor system performance using tools like Zabbix, or Prometheus, and proactively address issues to prevent downtime.

EDUCATION

June 2008

Bachelor of Instrumentation and control Engineering, Pouyandegan Danesh University

Certifications

- AWS Cloud Practitioner Essentials
- Devops administration pack

TECHNICAL SKILLS

- **Operating Systems:** Red Hat Enterprise Linux (RHEL), CentOS, Ubuntu, Debian, Arch Linux
- **Monitoring Tools:** Prometheus, Grafana
- **Scripting Languages:** Bash, Python
- **Configuration Management:** Ansible, Puppet, Terraform
- **Virtualization & Containers:** VMware, Docker, Kubernetes
- **Networking**: TCP/IP, DNS, DHCP, Load Balancers
- **Security**: SSL/TLS, SSH, PAM

LANGUGAE SKILLS

- English: B2
- German: A2

INTERESTS AND HOBBIES

- Certificated in Swimming training.
- Certificated in Bodybuilding and Fitness coaching 3rd degree.
